

HCLTech | Candidate Referral Document

Candidate Information

Candidate Name:	Suman V
Candidate ID:	CAND-2026-48291
Email:	suman.v02@gmail.com
Phone:	+91-6303286156
Referred By:	Rajlakshmi Shaw
Referral Date:	09/12/2026
Position Applied:	GCP Senior Data Lead (Req ID: 154889)
Department:	Data Engineering Practice
Business Unit:	HCLTech - Technology Services

This document contains the candidate's resume and associated recruitment activity records as captured in the HCLTech Applicant Tracking System. Pages 2-5 contain the candidate's resume. Pages 6-7 contain system-generated recruitment history and audit records.

Suman V

GCP Data Engineer

+91-6303286156 | suman.v02@gmail.com | [linkedin.com/in/suman-v-b5904643e](https://www.linkedin.com/in/suman-v-b5904643e)

PROFESSIONAL SUMMARY

- GCP Data Engineer with 4+ years hands-on experience designing, developing, and implementing scalable cloud-native data engineering solutions on Google Cloud Platform (GCP) and 8.5 years total IT experience.
- Strong expertise building end-to-end ETL/ELT pipelines using Google Cloud Dataflow (Apache Beam), BigQuery, Cloud Composer (Apache Airflow), Cloud Storage, Pub/Sub, Dataproc, and Cloud Functions.
- Proficient in Python and SQL for data ingestion, transformation, automation, and performance optimization of large-scale data processing workloads.
- Extensive experience designing and implementing data warehouses, data lakes, and dimensional data models to support enterprise reporting and analytics.
- Hands-on experience with batch and real-time data processing, integrating data from REST APIs, relational databases, Cloud Storage, and streaming sources using Pub/Sub.
- Strong knowledge of BigQuery optimization techniques: partitioning, clustering, materialized views, query tuning, and cost optimization.
- Experienced developing and managing workflow orchestration using Cloud Composer (Apache Airflow) for automated, scalable, reliable data pipelines.
- Proficient in Agile Scrum, CI/CD, Git, and DevOps practices with experience in deployment automation, production support, and performance monitoring.

TECHNICAL SKILLS

Cloud Platform:	Google Cloud Platform (GCP)
GCP Services:	BigQuery, Dataflow, Cloud Composer (Apache Airflow), Cloud Storage, Dataproc, Pub/Sub, Cloud Functions, IAM
Programming Languages:	Python, SQL, Shell Scripting
Databases:	BigQuery, SQL Server, MySQL, PostgreSQL
Data Engineering:	ETL, ELT, Data Warehousing, Data Lakes, Data Modelling, SCD Type 1 and 2, CDC
Big Data:	Apache Spark, Hadoop
Version Control:	Git, Jenkins, Cloud Build
Visualization:	Looker, Power BI
Methodologies:	Agile, Scrum, SDLC
AI/ML:	Vertex AI, TFX, MLflow, Predictive and Unsupervised Learning

PROFESSIONAL EXPERIENCE

W3Global India Pvt. Ltd. | Feb 2019 - Present

Role: Assistant Team Lead | GCP Data Engineer

Client: Apree Health | Domain: Healthcare | Duration: March 2024 - Present

Roles and Responsibilities:

- Designed and developed 45+ scalable ETL/ELT pipelines using Google Cloud Dataflow (Apache Beam) and BigQuery to process 8-12 million healthcare records daily from multiple source systems.
- Built and maintained a cloud-native Enterprise Data Warehouse (EDW) with 150+ BigQuery tables and 30+ Cloud Composer (Apache Airflow) DAGs, achieving 99.8% pipeline success rate and reducing manual intervention by 80%.
- Automated data ingestion from 15+ REST APIs, Cloud Storage, and relational databases, reducing data availability time from 6 hours to under 2 hours.
- Optimized BigQuery performance using partitioning, clustering, materialized views, and SQL tuning, improving query performance by 85% while reducing costs by 25%.
- Implemented HIPAA-compliant security using IAM roles, Authorized Views, and dataset-level access controls to secure 200+ GB of sensitive healthcare data.
- Improved reporting performance by 35% and reduced overall data processing effort by 50%, enabling faster healthcare analytics and business decision-making.

Client: AyoConnect | Industry: Financial Technology (FinTech)

Duration: Sep 2021 - February 2024 | Role: Data Engineer

Roles and Responsibilities:

- Designed and implemented 30+ cloud-native data pipelines using Google Cloud Dataflow and BigQuery to process 10+ million digital payment and banking transactions daily.
- Developed scalable data ingestion frameworks integrating data from 25+ banking partners, payment gateways, and REST APIs.
- Built a centralized BigQuery financial reporting platform with 120+ reporting tables for transaction analytics, revenue reporting, and executive dashboards.
- Developed real-time streaming pipelines using Pub/Sub and Dataflow, reducing transaction processing latency from 10 minutes to under 2 minutes.
- Implemented Cloud Composer (Apache Airflow) workflows automating end-to-end financial data processing, settlement reporting, and regulatory reporting, reducing manual effort by 60%.
- Optimized BigQuery performance using partitioning, clustering, and materialized views, reducing reporting time by 40% and query costs by 30%.

Client: Paack | Domain: E-commerce and Logistics

Duration: Feb 2019 - August 2021 | Role: Senior Analyst

Roles and Responsibilities:

- Analysed shipment, order, and delivery data to generate actionable insights and support business decision-making.
- Developed SQL queries to extract, validate, and analyse logistics data from multiple data sources.
- Created dashboards and KPI reports using Power BI/Looker to monitor delivery performance, warehouse operations, and SLAs.
- Performed data validation, reconciliation, and quality analysis to ensure accuracy and consistency of business data.
- Collaborated with logistics, operations, and business teams to identify trends, optimize processes, and improve operational efficiency.

Techgene India Pvt. Ltd. | Analyst

Duration: January 2018 - February 2019 | Domain: Product Information Management (PIM)

Roles and Responsibilities:

- Gathered and analysed business requirements, translating them into functional specifications.
- Performed SQL queries for data extraction, validation, reconciliation, and reporting.
- Performed data profiling and data quality analysis to ensure data accuracy and consistency.
- Created business reports and dashboards to support product and sales analytics.
- Supported UAT, prepared functional documentation, and coordinated with cross-functional teams.

PREVIOUS EXPERIENCE

- Worked as MIS Executive in Atlas Business Services from Dec 2012 to Nov 2017.

EDUCATION

- PG Diploma in Data Science, Osmania University, 2023
- Master of Computer Applications (MCA), Osmania University

CERTIFICATIONS

- Google Cloud Professional Data Engineer (in progress)
- Google Cloud Associate Cloud Engineer
- Apache Airflow Fundamentals - Astronomer

KEY ACHIEVEMENTS

- Reduced data pipeline failures by 99.8% through implementing robust error handling and retry mechanisms in Cloud Composer DAGs.
- Achieved 85% improvement in BigQuery query performance through strategic partitioning, clustering, and materialized view optimizations.
- Cut data processing costs by 30% through query optimization and smart resource allocation in Dataflow and BigQuery.
- Reduced manual data processing effort by 80% through end-to-end pipeline automation using Cloud Composer and Dataflow.
- Enabled real-time transaction monitoring by reducing streaming pipeline latency from 10 minutes to under 2 minutes using Pub/Sub and Dataflow.
- Built HIPAA-compliant data access framework securing 200+ GB of sensitive healthcare data across BigQuery datasets.
- Delivered 45+ production-grade ETL pipelines processing 8-12 million healthcare records daily with 99.8% SLA adherence.
- Led a team of 3 junior data engineers, conducting code reviews and mentoring on GCP best practices.

LANGUAGES

- English - Professional Proficiency
- Telugu - Native
- Hindi - Conversational
